Safety - Quality - Productivity

SAFETY

Management Policy Statement

Since our company was founded in 1986, we have had one motto: SAFETY – Quality – Productivity. From the beginning, we have known that of Burkes many concerns, none are more important than the safety of our employees, our clients, and our other team members. Therefore, the prevention of injuries and near misses is a primary management responsibility. We recognize that there are many hazards in the construction industry, but through sound safety practices, we believe injuries and near misses can be eliminated.

Our management team is committed to the investment necessary to obtain the desired safety culture by providing the environment, encouragement, support, training, and equipment needed to attain excellence in our safety performance.

We realize that in addition to the commitment of our management team, the key to the success of our safety program is our team members. Through training, evaluation, and retention of likeminded personnel, we can assure that we have a team fully committed to our goal of zero accidents and near misses.

We look forward to opportunities to safely work for you. If you should ever have any critical or unresolved safety issues with our company, please contact us directly.

Sincerely,

Chip Burkes
President

Mike Bircheat
Safety Director
